(BCA)**

Academic Year: 2025–2026

Abstract:

CreatorVault AI is a web-based platform designed to help content creators manage digital assets such as thumbnails, scripts, video clips, logos, and audio files. The system provides project management, asset tracking, version control, sharing functionality, analytics, and audit logging.

The platform helps creators organize their content efficiently and improves collaboration between creators and editors. CreatorVault AI serves as a centralized solution for managing creator assets and monitoring project activities.

Objectives:

- **Centralized asset management**
- **Project organization**
- **Version tracking**
- **Shareable asset links**
- **Analytics dashboard**
- **Audit logging**

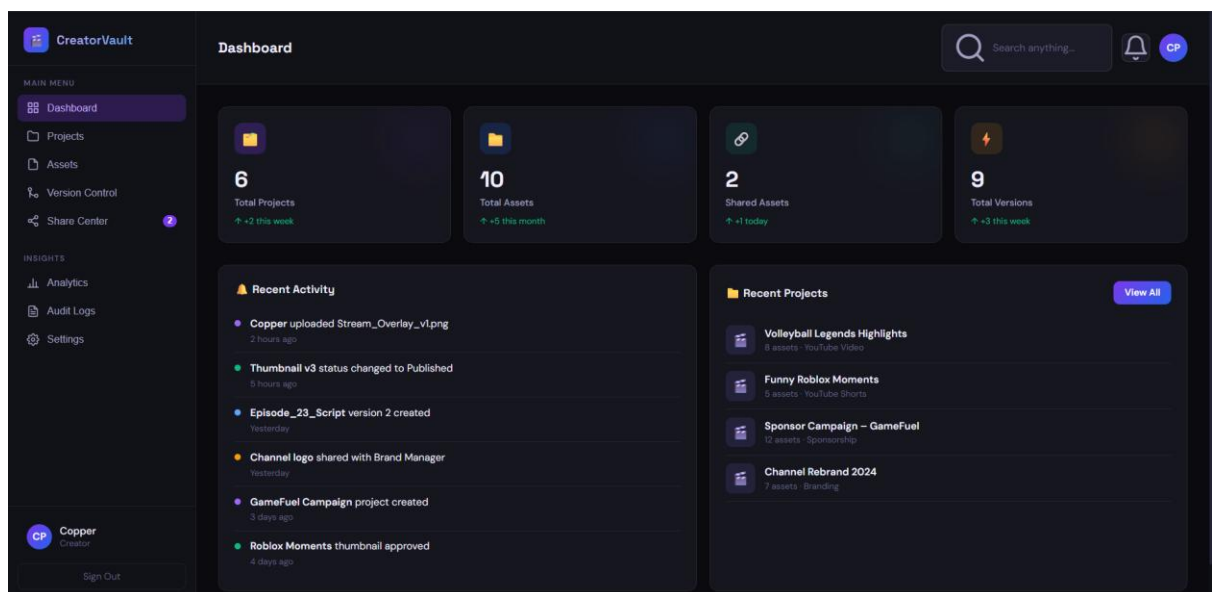

Technologies Used:

- **HTML5**
- **CSS3**
- **JavaScript**
- **LocalStorage**
- **Responsive Web Design**

Features

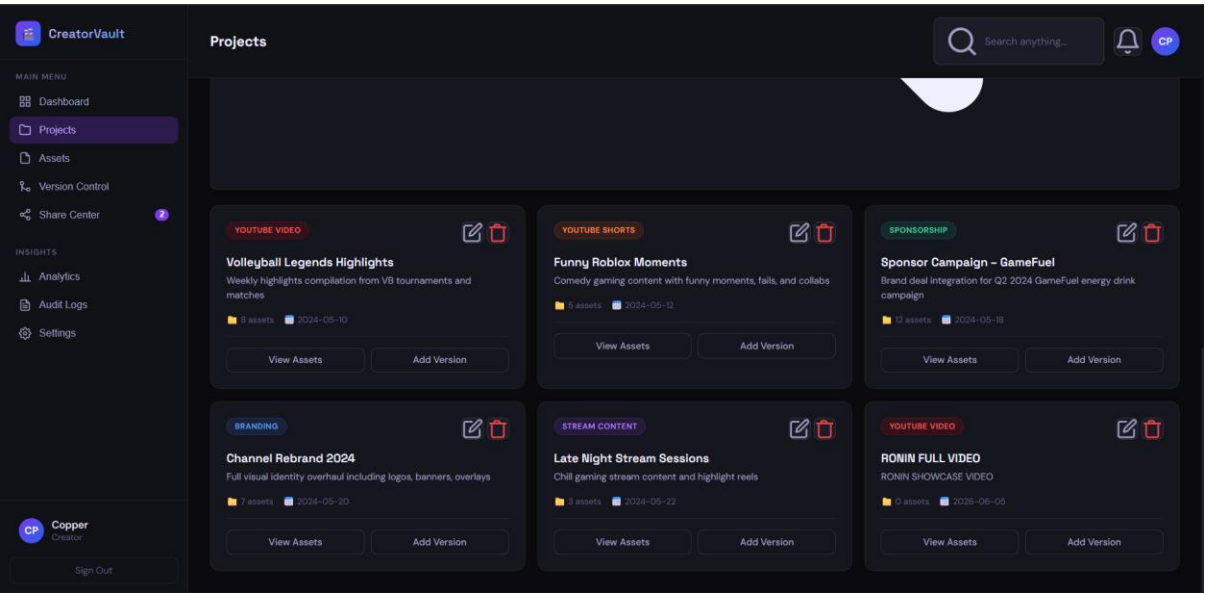

- **Dashboard**
- **Project Management**
- **Asset Management**
- **Version Control**
- **Share Center**
- **Analytics**
- **Audit Logs**
- **Settings Management**

DASHBOARD:-

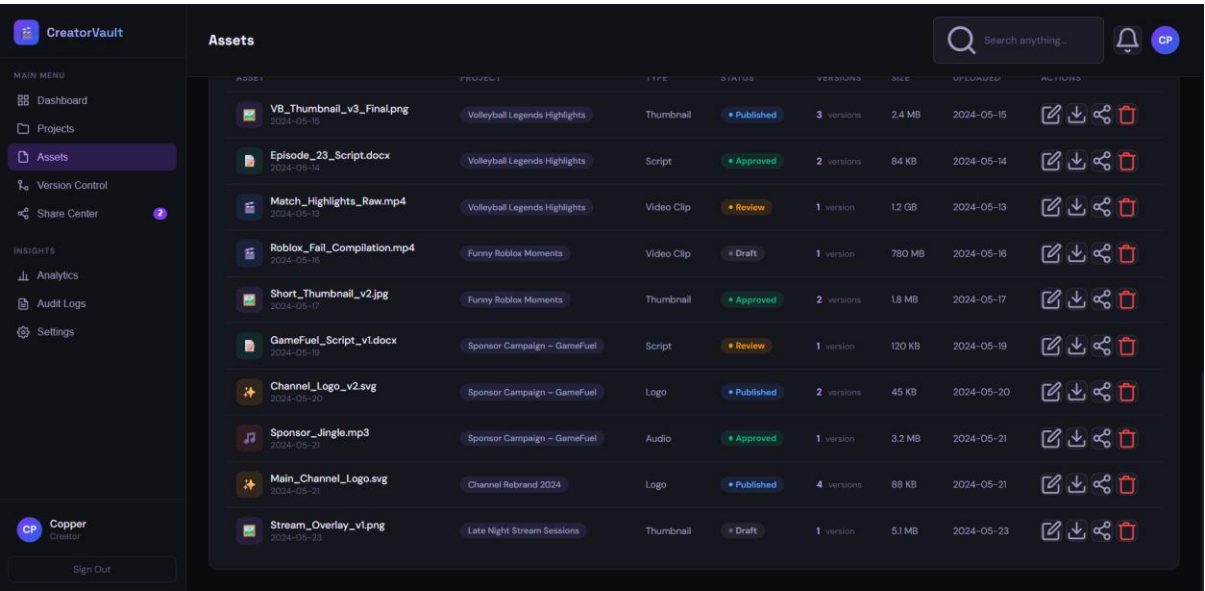

Modules :

PROJECT:-

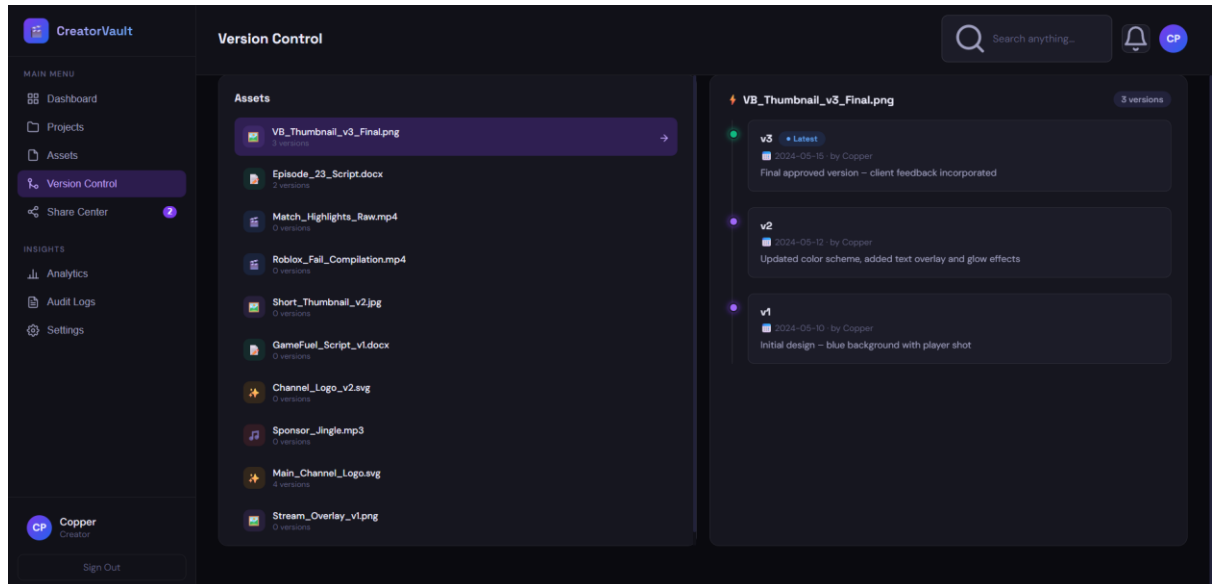

ASSET:-

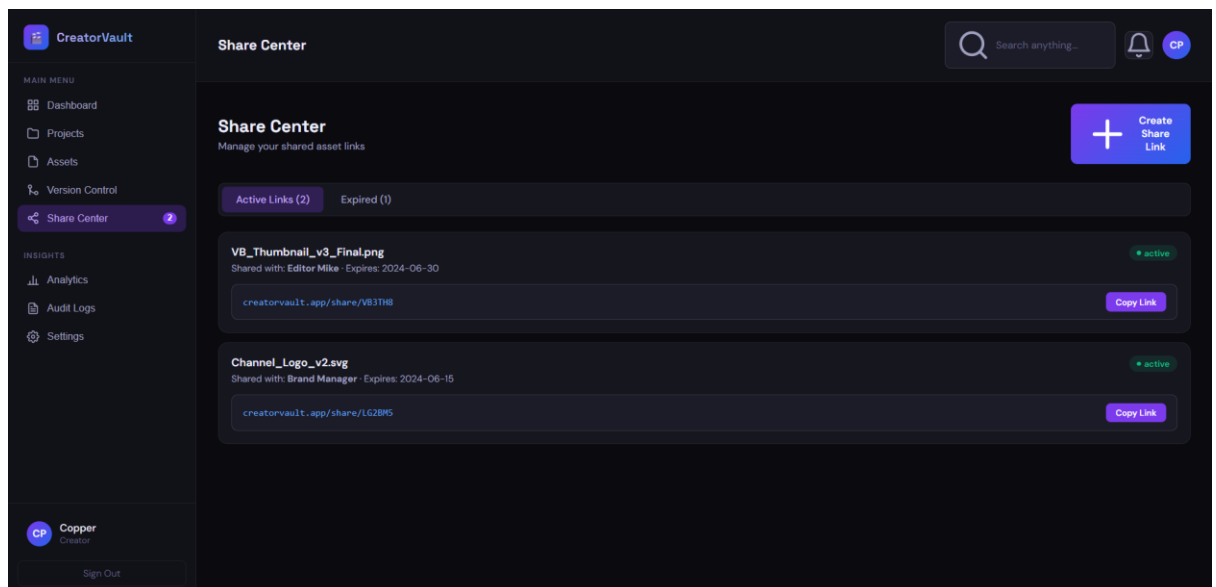

The Project Management module allows users to create, edit, and organize content projects. The Asset Management module enables storage and tracking of digital creator assets.

Version Control & Sharing:

VERSION CONTROL:-

SHARE CENTER:-

Version Control and Share Center help creators manage revisions and collaborate through secure asset sharing.

Conclusion

CreatorVault AI successfully demonstrates a centralized content creator asset management system. The platform provides project organization, version tracking, collaboration features, analytics, and activity monitoring.

Future enhancements may include cloud storage integration, AI-powered asset tagging, team collaboration features, and mobile application support.

Future Scope

- **Cloud Storage Integration**
- **AI Asset Tagging**
- **Team Collaboration Features**
- **Mobile Application Support**
